FEATURES AND BENEFITS

New panel design

This model features a stylish flat panel with fresh white color for a new sophisticated appearance.

The flat flaps close entirely when the unit is not operating and there are no air intake grilles visible.

Individual Airflow Direction Control *1

Airflow direction can be individually adjusted for each air discharge outlet to deliver optimal air distribution.

*1. Applicable when wired remote controller BRC1E63 is used.

Switchable fan speed: 5 steps and Auto

Control of airflow rate has been improved from 3-step to 5-step. Auto airflow rate is newly available.

Suitable for high ceilings

Even in spaces with high ceilings maximum 3.5 m, a comfortable airflow is carried down to the floor level.

Energy saving: Reduction of energy consumption

Power consumption is significantly reduced by specially developed small tube heat exchanger and DC fan motor.

Enhanced functions from various aspects such as maintenance

The flap parts are easy to clean because it is hard to condensate and get dirty.

Drain pump is equipped as standard accessory with 850 mm lift.

Check contamination in drain pan by simply remove suction grille and panel. Equipped with long life filter which requires only 1-year maintenance interval.

Adjuster pockets mount at four corners of the unit enable to adjust the main unit without removing the panel.

An antibacterial treatment that uses silver ions has been applied to the drain pan, preventing the growth of slime, mould and bacteria that cause blockages and odours. (The lifespan of a silver ion cartridge depends on the usage environment, but should be changed once every two to three years.)

Notes

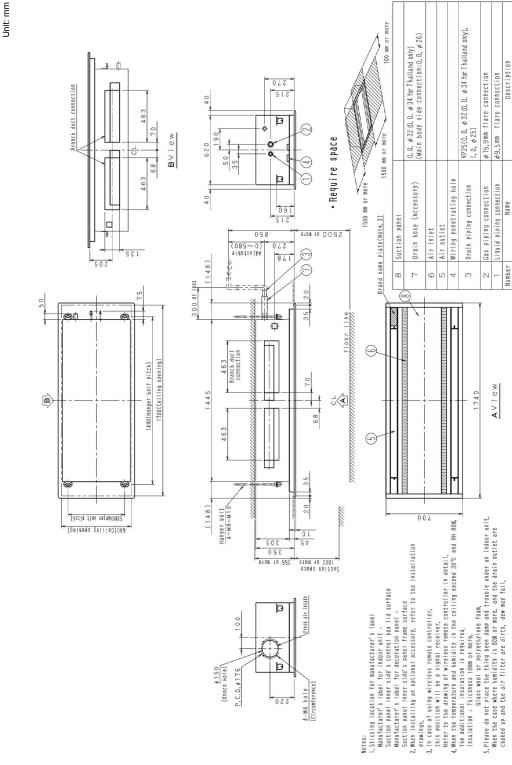

- *1. Indoor temp.: 27°CDB, 19°CWB / outdoor temp.: 35°CDB / Equivalent piping length: 7.5 m, level difference: 0 m.
- *2. Indoor temp.: 20°CDB, 15°CWB / outdoor temp.: 7°CDB, 6°CWB / Equivalent piping length: 7.5 m, level difference: 0 m.
- *3. Capacities are net, including a deduction for cooling (an addition for heating) for indoor fan motor heat.
 *4. Anechoic chamber conversion value, measured at a point 1.5 m downward from the unit center.
- During actual operation, these values are normally somewhat higher as a result of ambient conditions.
